

Gateway™ DICOM® Router

DICOM

DICOM ROUTER AND VENDOR NEUTRAL
ARCHIVING SOLUTION

About us

Our Company

Our company is Canadian and was established in 1994. After over 20 years, we continue to be a leading healthcare IT software and services company specialized in radiology. We develop fully customizable, feature-rich imaging workflow solutions for healthcare providers, allowing them to overcome day-to-day challenges. As a company, we pride ourselves on diversity, which thoroughly enriches our environment.

Our Footprint

With over 600 installations in 22 countries, our healthcare IT solutions are trusted by imaging facilities worldwide. In addition to our US and Canada-based sales teams, we have distributors that are conveniently located in multiple regions around the world, including North America, Oceania, Latin America, Europe, Africa, and Asia.

Our Mission is Simple

We help save lives daily. That's why we strive to be the software of choice for healthcare imaging providers who want to be leaders. Through innovative design, outstanding support and heartfelt effort, we offer the very best to our customers.

Our Commitment

Our commitment is to continue to evolve with the industry demands by constantly improving and automating radiology workflow. We'll save you time and money. There's no such thing as "good enough" at RamSoft. We work smart to leverage our expertise in medical imaging software to deliver great end results to our clients.

RamSoft takes great care to ensure your data remains secure during transmission to maintain HIPAA Compliance. Data is transmitted in full TLS encryption ensuring secure communication over the Internet to all other compliant devices.

SECURE AND EASY TO INSTALL SOFTWARE

WHY SWITCH TO RAMSOFT'S TECHNOLOGY?

Our VNA Gateway™ DICOM router offers the utmost flexibility with an unlimited amount of storage, studies, and modalities. Sites have the ability to archive images on a PC or server; the freedom to work with multiple storage volumes and any number of hard drives (NAS or SAN); and the convenience of storing images on a flash drive.

WHAT SETS GATEWAY™ DICOM ROUTER APART?

Gateway™ DICOM router is a full-featured, online DICOM vendor neutral archive, built on the same SQL platform as our powerful enterprise grade PACS database. It's designed to store, retrieve, and archive hundreds of thousands of studies per year, while its intuitive DICOM engine provides unmatched functionality and flexibility. Our application is HIPAA compliant, secure, easy-to-use, and robust. Its superior data management capabilities combined with its security features make it the ideal solution for all your imaging needs. We designed Gateway™ DICOM router with simplicity in mind. Installation and setup is quick and painless, without IT complexity, and you can be up and running in less than 5 minutes.

MORE THAN JUST A DICOM ROUTER

Gateway™ DICOM router is also a vendor neutral archiving solution. It ensures patient data and study images are stored according to industry standards, so they're compatible with any number of disparate RIS and PACS solutions. Gateway™ DICOM router communicates via DICOM to support the query/retrieve functionality of patient images between PACS solutions. The router's optional feature has the ability to communicate via HL7, ensuring a seamless transfer of patient demographics and report information between RIS systems. It also follows the DICOM standard and not proprietary technology to store your patient data, thereby saving you substantial sums of money on data migration and cleansing should you ever need to make it available to another RIS or PACS vendor.

Get Up and Running in Less than 5 minutes

POWERFUL PERFORMANCE. **DOWNLOADED AND USED BY HUNDREDS.**
Universal DICOM Router that works for any healthcare setting.

Advanced Router Option (Add-On)

Advanced Router Option Features

- **Rapid Routing:** Opens up additional lines of communication from the modalities to the PACS, which accelerates data and image transfer over the Internet.
- **Custom Scriptable Routing Rules:** Custom routing and processing using almost any tag in a DICOM object, which eliminates time consuming tasks by QC/post-processing tech.

Support

- 24/7 emergency support
- Customer live chat
- In-software problem submission
- Website support case submission
- Toll-free phone support

Compliance

- IHE
- DICOM
- SSL Encryption
- HIPAA
- HL7
- PIPEDA (Canadian Federal Privacy Law)

Resources

- e-Learning University
- Webinars
- RamSoft's Community Portal
- RamSoft website
